What people told us

Work and Local Economy

Is there an active local economy and the opportunity to access good quality work?

Good quality work can offer important benefits through the income, activity, social networks and sense of identity and satisfaction that it can bring. A thriving local economy can provide work opportunities and help create lively and attractive places where people want to spend time.

Is there an active local economy and the opportunity to access good quality work?

Summary of Key issues

- Lack of job opportunities and potential for career development. Job availability not good outside public sector.
- Lack of availability of childcare and the costs of childcare restrict opportunity.
- Training, education and skills are perceived as requiring strengthening, though many positive comments on local training and education provision.
-
- More support/incentives required for Business start-up and reduction of associated costs.
-
- Lots of comments concerned about retention of young people.
- There is a perception of prejudice and bias towards “locals” connections including the church.
- Improvements required in connections through transport/ITC and Broadband.

- 35-44
- 45-54
- 55-64
- 65-74
- 75+

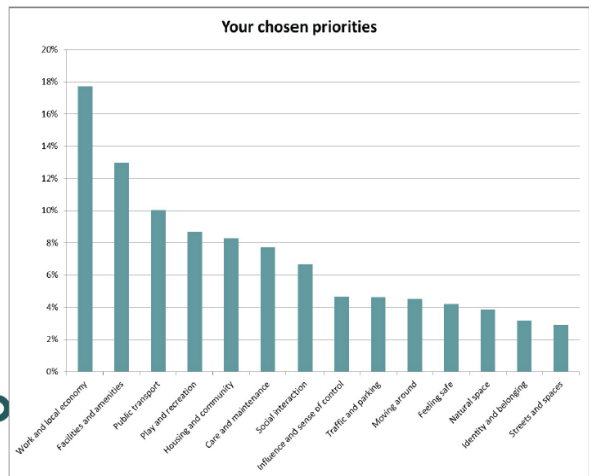

Proportion of respondents from different areas

However this bar chart shows which areas you felt the CPP should prioritise

The diagram shows how you scored each theme area in relation to room for improvement

What happens next:

The Community Planning Partnerships looks at all the information you gave us, data from other sources (such as the Health Board and Scottish Government) and they will then decide on the priorities it will focus on trying to improve for the next few years. We will also meet with residents in two locality areas to look at the information from the survey in more detail and develop plans.

More detail on the survey will be issued in due course. For any queries please contact info@ohcpp.org.uk
