

Board meeting: 22 November 2019

Corporate risk CRR 19-6 update

Recommendation/action required:

The Board is requested to consider the update on risk 19-6 on the Corporate Risk Register (CRR) to ensure they are sufficiently assured by the actions taken or proposed to mitigate the risks to the organisation of reputational damage to our mission during this transition period.

Corporate Risk CRR 19-6 Update

Purpose

1. The Board is requested to consider the risk report 19-6 on the Corporate Risk Register (CRR) in Appendix 1 and to confirm whether the actions described here provide sufficient assurance that appropriate action is being taken to mitigate the risks to the organisation of reputational damage to our mission during this transition period

Risk 19-6: As a result of not retaining influence with and support from important stakeholders in the transition year, there is a risk that our key messages and core agenda are not carried over as powerfully into Public Health Scotland, reducing its credibility and impact in reducing health inequalities.

Background

2. Health Scotland continues to engage staff and stakeholders through partnership working, events and communications activities as we deliver the five Strategic Priority areas in our Fairer Healthier Scotland Delivery Plan 2017-22. Carrying over our 15 years of public health leadership and learning to Public Health Scotland will help ensure continued impact on reducing health inequalities.

The following set of outcomes steer our effective planning for influence and engagement over the transition period:

- The focus and momentum of our core business to improve health and reduce inequalities remains a focus of work and our communications over the period.
- Key stakeholders continue to recognise Health Scotland for our focus on health inequalities and the right to health and expect to see this focus carried on into Public Health Scotland.
- Staff and stakeholders are enabled to mark and celebrate the ending of NHS Health Scotland with 'tangible' products and events, which both celebrate impact and signal future work.

Finance and Resource Implications

3. The specific activities associated with transition are costed within our final 2019/20 Delivery Plan.

Staff Partnership

4. There are no staff partnership issues arising from this paper.

Communication and Engagement

5. The CRR is published on the NHS Health Scotland Website, and updates to the CRR included as part of the Quarterly Corporate Performance Reports will also be published on the website. This paper will also be included in the suite of Board papers published on the NHS Health Scotland website.

Corporate Risk

6. This paper is specifically designed to consider Corporate Risk CRR 19-6, as described above. It also brings more focus to the strategic programmes of work for which we want to achieve and maintain a particularly high level of visibility with external stakeholders, which is critical to maintaining the credibility and sense of continuity with stakeholders over this transition period.

Issues Associated with Transition

7. CRR risk 19-6 is focussed on the transition to the new public health body.

Promoting Fairness

8. No promoting fairness issues have been identified.

Sustainability and Environmental Management

9. No sustainability or environmental management issues have been identified.

Action/ Recommendations

10. The Board is requested to consider the risk report 19-6 on the Corporate Risk Register (CRR) in Appendix 1 and to confirm whether the actions described here provide sufficient assurance that appropriate action is being taken to mitigate the risks to the organisation of reputational damage to our mission during this transition period

Appendix 1: CRR 19-6 update

Risk 19-6

Description

As a result of not retaining influence with and support from important stakeholders in the transition year, there is a risk that our key messages and core agenda are not carried over as powerfully into Public Health Scotland, reducing its credibility and impact in reducing health inequalities.

Risk Category and Appetite: Business, Open

Governance Committee: Board

Risk Owner: Director or Strategy

Response Co-ordinator: Organisational Lead for Communications

Gross Score: 12 (Impact 4; Likelihood 3)

Controls in Place

- Transition & Influence Plan: Building Our Future - which sets out our priorities for engaging with staff and stakeholders over the next nine months in order that:
 - The impact of Health Scotland's work in advancing efforts to improve health and tackle inequalities in health in Scotland is understood
 - The key priorities and principles of that work are therefore transitioned effectively into Public Health Scotland, through our own efforts and with the targeted support of key stakeholders.
- Embedding key messages on transition/Public Health Scotland into stakeholder communication (e.g. Notes to Editors in press release, business-as-usual communications and strategic social media content).

Actions Taken in Last Quarter

- High profile print and broadcast media coverage on Flu (Know the facts campaign), MUP and publication of a corporate blog on Gender based violence
- Trade publication coverage in Holyrood Magazine (print & digital)
- Successful involvement within industry events (co-hosted the 'Poverty and Health Inequalities Summit' with Scottish Government. Minister, Joe Fitzpatrick, Michael Marmot and various NHSHS staff attended. We also attended and chaired a number of sessions at the October 5th International Law Enforcement and Public Health conference.

- We hosted a stall at the CPG on Health Inequalities Parliamentary Reception with the WHO and promoted our Building our Future report, chaired by Anas Sarwar MSP
- We gave evidence at the Health and Sport Committee on Primary Care and also at the round table on Social Prescribing
- We worked in collaboration with LGiU to publish a podcast with Gerry McCartney on life expectancy and poverty
- Positioning statements were published on:
 - Scottish Affairs Committee drugs inquiry report (with NSS)
 - Poverty & Health Inequalities Summit
 - Scotland's National Transport Strategy going the right direction for public health
- We strategically supported 'Challenge Poverty' Week and Scottish Climate Week with various activity – working closely with partners

Measures

- Our reputation and profile as the lead agency for tackling inequalities in health is maintained and understood.
- Health Inequalities are embedded at the heart of Public Health Scotland.
- Stakeholders are informed and engaged in our transition process.

Net Score: 8 (Impact 4; Likelihood 2)

***The Risk Assessment Matrix can be found in Appendix 2.**

Appendix 2 – Risk assessment matrix

		Likelihood				
		1 Rare	2 Unlikely	3 Possible	4 Likely	5 Almost Certain
Impact	1. Negligible	1 Very Low	2 Very Low	3 Low	4 Low	5 Medium
	2. Minor	2 Very Low	4 Low	6 Medium	8 Medium	10 Medium
	3. Moderate	3 Low	6 Medium	9 Medium	12 High	15 High
	4. Major	4 Low	8 Medium	12 High	16 High	20 Very High
	5. Extreme	5 Medium	10 Medium	15 High	20 Very High	25 Very High

Risk appetite matrix

Net Risk Assessment	Risk Appetite	Risk Appetite Response
20-25 – Very High	Hungry	Eager to be innovative and to choose options offering potentially higher rewards despite greater inherent risk.
12-16 – High	Open	Willing to consider all options and choose the one that is most likely to result in success, while also providing an acceptable level of reward
5 -10 – Medium	Cautious	Preference for safe delivery options that have a low degree of inherent risk and may only have limited potential for reward
3 - 4 – Low	Minimalist	Preference for ultra-safe business delivery options that have a low degree of inherent risk and only have potential for limited reward
1-2 – Very Low	Averse	Avoidance of risk and uncertainty is a key organisational objective
